Working in the Floriculture Industry you must be busy enough as it is. And often it also takes a lot of time to find information on for example where to buy premium seeds and/or other products that you need on your farm/company. Maybe you would also like to know what kind of plant varieties are used in Indonesia at the moment. We compiled a list of more than 400! Currently only limited information is available on each plant. For more indepth information on the most popular plants please go to “ plant highlights ” on this site.

**Information listings available**
