

The earthquake and landslide that occurred on November 21 2022 with a magnitude of 5.4 in the Cianjur district, West Java, caused more than 400 fatalities, destroyed physical buildings such as houses, public facilities and other infrastructure. This incident deeply touched the concerns of various parties, including the ASBINDO extended family both on behalf of the organization and its members individually who also sent assistance in the form of logistics and to help relieve the needs of the affected victims during the emergency response.

The disaster has passed, but the heaviest impact felt as a result of this very deep grief is the psychological factor which of course cannot be easily recovered in a short time. not a few people who feel the same way are unable or realize the importance of doing the same thing.
